**Playsculpture climbslide 11.0**

While adults will appreciate «climbslide 11.0» as an aesthetically designed play sculpture, children will see it as a small world full of adventures. Whether in the large or small version, «climbslide 11.0» guarantees not only fun but also encounters and movement.

**Design:**

All objects originate from a single form – the so-called double helix, the form of the DNA strands of all living things. They thus have an energising and harmonising effect on people and the environment.

**Material:**

All products are constructed using 100% ecological and sustainable Accoya wood, and have a minimum outdoor life span of 25 years. They are low-maintenance and resistant to vandalism.

**Safety:**

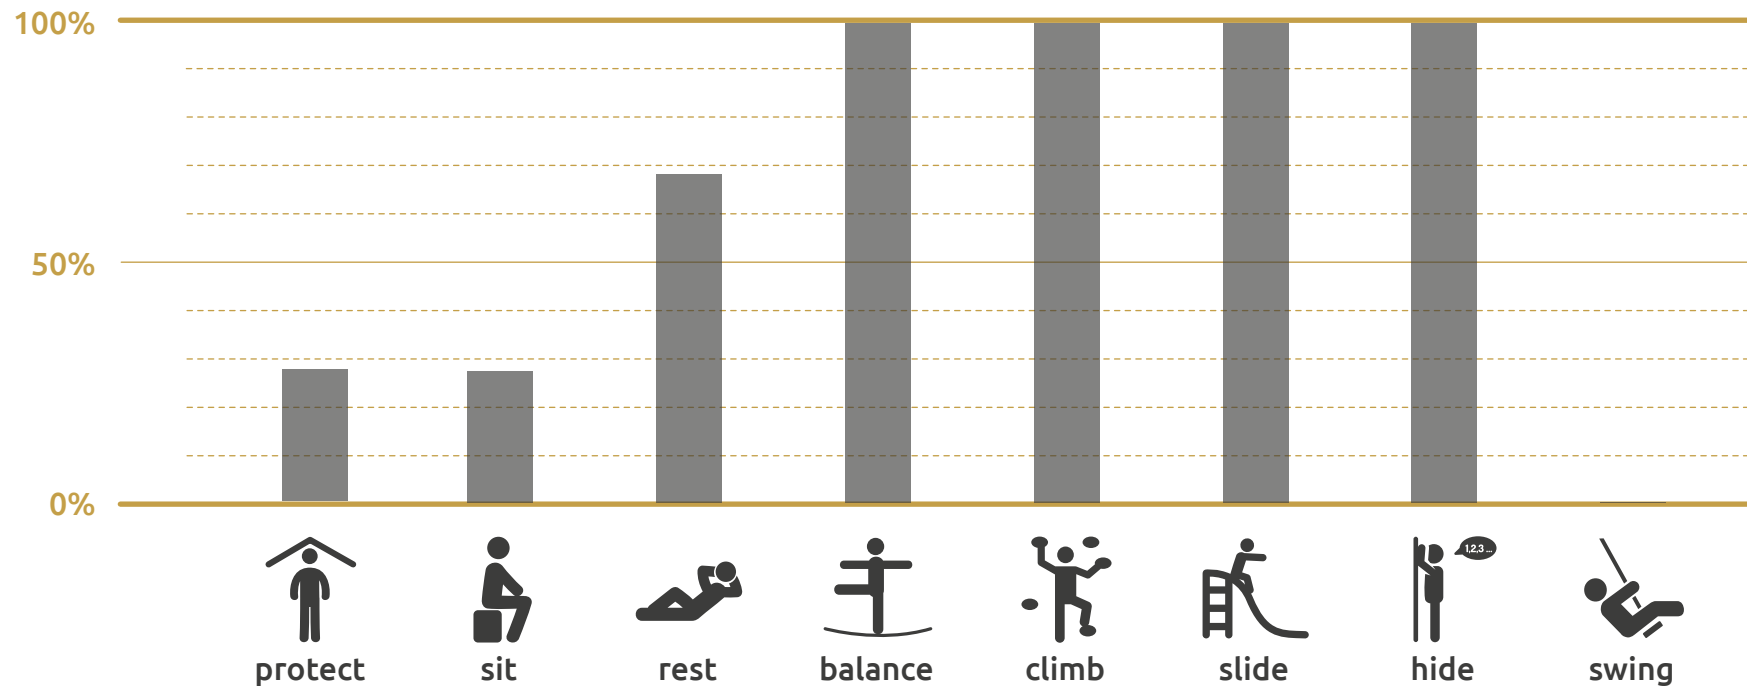

All objects are manufactured according to European safety standards for playground equipment SN EN 1176.

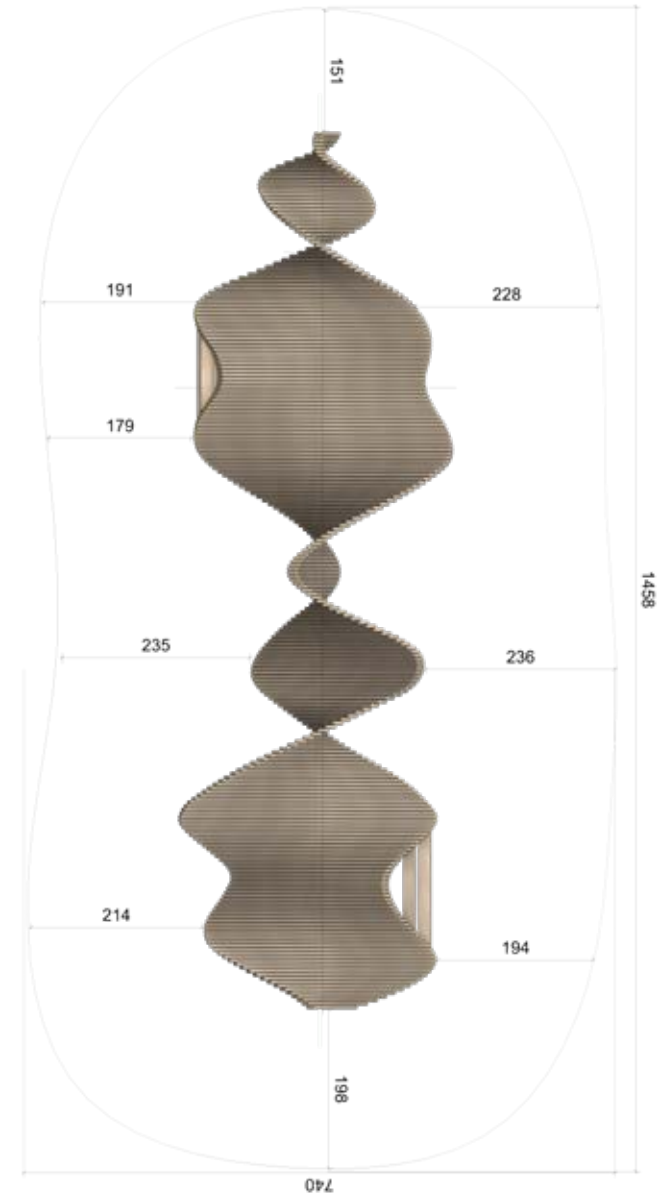

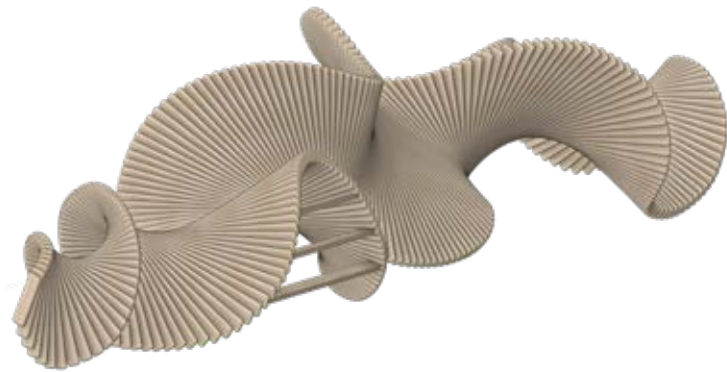

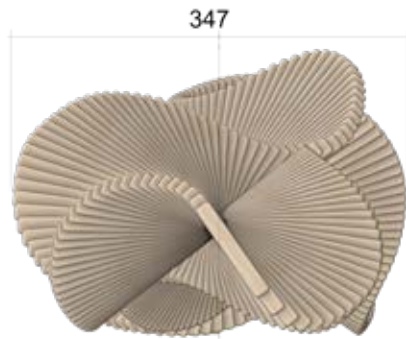

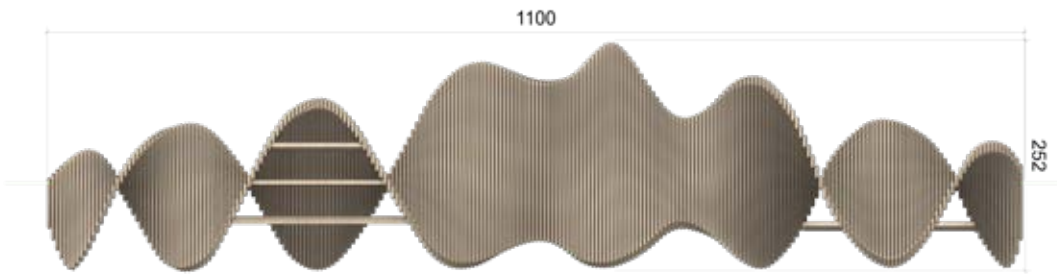

**Tech. Specifications:**

Length: 1100 cm  
 Width: 347 cm  
 Height: 252cm  
 Weight: 2950 kg  
 Critical fall height: 252 cm  
 Number of foundations: 8  
 Construction time (approx.):  
 4 pers. à 7 hrs.  
 Crane required
