

**wave**  
moveart playsculptures

### **Playsculpture wave**

Thanks to its non-uniform backrest, the «wave» offers users the opportunity to relax the back and the posterior. The playful shape, which is evocative of a wave, is ideal for incorporating into new or existing residential districts, garden areas or public parks as part of landscaping or architecture.

### **Design:**

All objects originate from a single form – the so-called double helix, the form of the DNA strands of all living things. They thus have an energising and harmonising effect on people and the environment.

### **Material:**

All products are constructed using 100% ecological and sustainable Accoya wood, and have a minimum outdoor life span of 25 years. They are low-maintenance and resistant to vandalism.

### **Safety:**

All objects are manufactured according to European safety standards for playground equipment SN EN 1176.

### **Tech. Specifications:**

Length: 228 cm  
Width: 104 cm  
Height: 58 cm  
Weight: 85 kg  
Number of foundations: 1  
Construction time (approx.):  
1 pers. à 1,5 hrs.
